

How to Record a Video Consult

1. **Download the Loom Desktop App** at <https://www.loom.com/desktop>
2. **Open the pictures** that were sent by the patient
3. **Open the Loom Desktop App**, and **select Screen + Cam with Full Screen** as your capture mode settings
4. Once ready, **click Start Recording**
5. **Record** everything you want to say and go through the pictures. You can use a marker tool from the sidebar on the left side of your screen to highlight information. This same sidebar allows you to pause, stop, or delete the recording.
6. Once you are done, **click to end the recording**
7. Your video will process to your **Loom video library**, where you have the ability to **trim your recording** so the viewer does not see the first few moments while you were setting up.

For further help, go to Loom's instructions at <https://support.loom.com/hc/en-us/categories/360000244777-How-To-Use-Loom>
